

Insert coin. Get ready.

OPEN ROAD is an arcade driving game: a coast-to-coast road trip across ten stunning stages, for iPhone, iPad and Mac.

About the game

Just you, your bright red convertible and the open road. On a high-speed, coast-to-coast road trip across ten stunning stages. Cruising through beautiful landscapes against nothing but the clock, traffic and the wind in your hair.

One continuous drive from dawn on a seaside boulevard to sunset on a coastal island two days later, with an original groove soundtrack that shifts with the journey. Beat the clock to each checkpoint: every second saved rides on, and what's left at the end is your score.

Built for a calm, satisfying drive: one-touch controls or tilt on iPhone and iPad, keyboard or controller on Mac, and graphics that adapt automatically to stay smooth. No ads, no in-app purchases, no account, no data collected.

Facts
